Safety information

Do not let children (or pets) play in or on your washing machine. The washing machine door does not open easily from the inside and children may be seriously injured if trapped inside.

Usage cautions

⚠ CAUTION

When the washing machine is contaminated by a foreign substance such as detergent, dirt, food waste, etc., unplug the power plug and clean the washing machine using a damp, soft cloth. • Failure to do so may result in discolouration, deformation,

The product you have purchased is designed for domestic use only. Using the product for business purposes qualifies as a product misuse In this case, the product will not be covered by the standard warranty provided by Samsung and no responsibility can be attributed to Samsung for malfunctions or damages resulting from such misuse. Do not stand on the appliance or place objects (such as laundry,

lighted candles, lighted cigarettes, dishes, chemicals, metal objects, etc.) on the appliance · This may result in electric shock, fire, problems with the product,

Do not press the buttons using sharp objects such as pins, knifes,

fingernails, etc.

This may result in electric shock or injury.

Critical cleaning warnings

⚠ WARNING

Do not clean the appliance by spraying water directly onto it. Do not use the strong acidic cleaning agent. Before cleaning or performing maintenance, unplug the appliance

Installation

water hose to the inlet valve on the back of the washing machine. Turn the hose clockwise to

Connect the other end of the

3. Open the water tap and check if there are any leaks around the the steps above.

⚠ WARNING

Stop using the washing machine if there is a water leak, and contact a local Samsung service centre. Otherwise, this may cause electric shock

⚠ CAUTION

tch the water hose by force. If the hose is too short, replace the hose with a longer, high-pressure hose.

Installation

1. Open the hose cap (A), and insert hose using the joint ring.

Pump type

NOTE

The position (side or rear) of the drain outlet depends on the · Availability of the hose cap

2. Connect the other end of the drain hose to a standpipe or basin

WARNING ake sure the end of the drain hose is not submerged by water. Otherwise, the washing machine may suffer serious damage.

⚠ CAUTION

Do not let the drain hose run over doorsills that protrude 5 cm (**) or more from the floor.

 Do not run the drain hose under the bottom of the machine.

STEP 5 Power on

Plug the power cord into a wall socket featuring an AC 220 V / 50 Hz approved electrical outlet protected by a fuse or circuit breaker Then, press POWER to turn on the washing machine.

Safety information

Congratulations on your new Samsung washing machine. This manual contains important information on the installation, use and care of your appliance. Please take some time to read this manual to take full

advantage of your washing machine's many benefits and features. What you need to know about the safety instructions

Please read this manual thoroughly to ensure that you know how to safely and efficiently operate the extensive features and functions of your new appliance. Please store the manual in a safe location close to the appliance for future reference. Use this appliance only for its intended purpose as described in this instruction manual. Warnings and Important Safety Instructions in this manual do not cover all possible conditions and situations that may occur. It is your responsibility to use common sense, caution and care when installing, maintaining and operating your washing machine. Because the following operating instructions cover various models, the characteristics of your washing machine may differ slightly from those described in this manual and not all warning signs may be applicable. If you have any guestions or concerns, contact your nearest service centre or find help and information online at www.samsung.com.

Important safety precautions

What the icons and signs in this user manual mean: **△** WARNING

Hazards or unsafe practices that may result in severe personal injury, death and/or property damage

Safety information **Critical installation warnings**

∆WARNING

The installation of this appliance must be performed by a qualified technician or service company

Failure to do so may result in electric shock, fire, an explosion, problems

Plug the power cord into a wall socket or higher and use the socket

for this appliance only. Never use an extension cor-· Sharing a wall socket with other appliances using a power strip or

extending the power cord may result in electric shock or fire. • Ensure that the power voltage, frequency, and current are the same as

those of the product specifications. Failure to do so may result in electric shock or fire. Plug the power plug into the wall socket firmly.

Remove all foreign substances such as dust or water from the power plug terminals and contact points using a dry cloth on a regular basis.

· Failure to do so may result in electric shock or fire.

Unplug the power plug and clean it with a dry cloth

 Plug the power plug into the wall socket so that the cord is running towards the floor. If you plug the power plug into the socket in the opposite direction, the electric wires within the cable may be damaged and this may result in electric shock or fire.

This appliance must be properly grounded.

Installation

Installation requirements Electrical supply and grounding

⚠ WARNING

AC 220 V / 50 Hz fuse or circuit breaker is required

- . Use an individual branch circuit specific to the washing machine.
- · Do NOT use an extension cord.
- · Use only the power cord that comes with the washing machine. . Do NOT connect the ground wire to plastic plumbing, gas lines,
- or hot water pipes Levelling
- To prevent tumbling or noise, install the washing machine on a solid, flat floor without a platform or bricks.
- Keep the washing machine at 10 cm from each adjacent wall.
- Water supply · Make sure water taps are easily accessible.
- Turn off the taps when the washing machine is not in use.
- · Check for any leaks at the water hose fittings on a regular basis
- Make sure the drain hose is not clogged. We recommend a standpipe in height of 90-100 cm. The drain hose must be connected through the hose clip to the standpipe, and the
- standpipe must fully cover the drain hose. The standpipe specifications mentioned here are only applicable to pump-type models.

Before you start

The basics

To add a laundry-specific

detergent, follow these steps: . Open the door. Locate the detergent drawer

 Apply powder detergent as nmended by the manufacturer. Add fabric softener as recommended by the manufacturer, and then close

CAUTION Make sure to use detergent as

appropriate. An excessive amount of detergent may not dissolve well. Do not add too much softener. This may reduce the performance Do not leave softener into the

softener dispenser for a long time The softener becomes hardened Child Lock and may not dissolve well.

Child Lock is designed to prevent accidents by children or infants, such as

drowning. 1. Press Power. 2. To activate the Child Lock, hold down Function and Monsoon

simultaneously for 3 seconds. The indicator blinks. 3. To deactivate the Child Lock, hold down Function and Monsoon simultaneously for 3 seconds. The indicator turns off. If the tub has contained water, simply restart the machine and hold down two

⚠ CAUTION . Do not place or keep blankets in the tub. buttons simultaneously for 3 seconds to deactivate the Child Lock.

washing and drying is complete.

Safety information

⚠ CAUTION

Hazards or unsafe practices that may result in personal injury and/or property damage

NOTE

Indicates that a risk of personal injury or material damage exists. These warning signs are here to prevent injury to yourself and others. Please follow them explicitly.

After reading this manual, store it in a safe place for future reference. Read all instructions before using the appliance. As with any equipment that uses electricity and moving parts, potential hazards exist. To safely operate this appliance, familiarize yourself with its operation and exercise care when using it.

Important safety precautions

⚠WARNING

To reduce the risk of fire, electric shock, or injury to persons when using your appliance, follow basic precautions, including the following:

1. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

Do not ground the appliance to a gas pipe, plastic water pipe, or

- . This may result in electric shock, fire, an explosion, or problems with
- the product · Never plug the power cord into a socket that is not grounded correctly and make sure that it is in accordance with local and national

Do not install this appliance near a heater or any inflammable material. Do not install this appliance in a humid, oily or dusty location, or in a

location exposed to direct sunlight or water (rain drops). Do not install this appliance in a location exposed to low temperatures

· Frost may cause the tubes to burst. Do not use an electric transformer.

. This may result in electric shock or fire. Do not use a damaged power plug, damaged power cord, or loose wall

. This may result in electric shock or fire. Do not pull or excessively bend the power cord

Do not twist or tie the power cord. Do not hook the power cord over a metal object, place a heavy object on the power cord, insert the power cord between objects, or push the power cord into the space behind the appliance

This appliance should be positioned so that the power plug, the water supply taps, and the drain pipes are accessible.

Step-by-step installation

STEP 1 Select a location

- Solid, level surface without carpeting or flooring that may
- Away from direct sunlight Adequate room for ventilation and wiring
- freezing point (0°C)

Away from a heat source

e washing machine comes with e Anti-rat panel that protects mall animals such as rats from ntering the machine. nsert the panel into the bottom of the machine. To facilitate the ork, slightly lift up the bottom

NOTE

- · Some models feature the Anti-rat panel that must be inserted from
- the rear bottom of the model. For this model, insert the Anti-rat panel before levelling the machine. To facilitate the work, slightly lift up the bottom rear

Availability of the Anti-rat panel depends on the model

Vith the Child Lock enabled

- You can still manipulate on the control panel while the door is closed. If you open the door, an information code (CL, dC) appears with an alarm Then, the machine starts forced draining after 30 seconds in order to
- event infant or child accidents such as drowning If the door leaves open for 30 seconds with the tub containing water, the machine drains the water with the "CL" code, which you cannot stop.

 To add detergent or more laundry in the tub, or to change the cycle

settings, you must first deactivate the Child Lock. **⚠ WARNING** If you open the door with the Child Lock enabled, the machine starts forced draining to prevent accidents such as drowning.

NOTE The Child Lock remains active after you power off the machine. You cannot deactivate the Child Lock as long as the "CL" code appears on the display. But, you can deactivate when the dC code appears by holding

rroubleshooting				
Checkpoints				
If you encounter a problem with the washing machine, first check the table below and try the suggestions.				
Problem	Action			
Does not turn on.	Make sure you use rated power for the product. Make sure the power cord is completely plugged in. Check the fuse or reset the circuit breaker.			
Does not start.	Make sure the door is closed. Make sure the water taps are open. Make sure to press or tap START/PAUSE to start the washing machine. Make sure Child Lock is not activated. Before the washing machine starts to fill, it will make a series of clicking noises to check the door open and does a quick drain. Was the door opened during the spinning cycle? Close the door, and press or tap START/PAUSE to resume. The machine enters Standby or is in a soaking cycle. Please wait. Check the fuse or reset the circuit breaker.			
Water is not supplied.	Make sure you press or tap START/PAUSE after selecting the water supply. Make sure the water taps are open. Is the filter net at the water supply nose connector clogged? Clean the filter net by brushing with a toothbrush. Is the water supply cut off? If the water supply is cut off, close the tap and power off. Straighten the water supply hoses. Open and close the door, then press or tap START/PAUSE If the water pressure is low, it takes longer to start washing. If the water level is not as high as necessary or lower than expected, use the level selector to adjust the water level.			
After a cycle, detergent remains in the automatic dispenser.	Make sure the washing machine is running with sufficient water pressure. Make sure the detergent drawer is properly inserted. Remove and clean the detergent drawer, and then try again.			

Operations Control panel ress this button to finish the wash at a specified tir o cancel the Delay End settings, simply turn off the You can set the Delay End time up to 24 hours.

change the sequence. To resume operation, press again Simple steps to start

Press to turn the washer on or off.

08 START/PAUSE sequence, press once to stop operation, and then

Press to stop or resume operation. To change the cycle

- . Press POWER to turn on the washing machine 2. Select a cycle in the cycle panel.
- Change the cycle settings (wash, rinse, and/or spinning) as necessary To add an option such as Monsoon, press the corresponding button. 5. Press START/PAUSE.

To change the cycle during operation

1. Press START/PAUSE to stop operation Select a different cycle, and repeat steps 2-3 above if necessary. 3. Press START/PAUSE again to start the new cycle

Problem	Action
Fills with the wrong temperature water.	Fully open both water taps. Make sure the temperature selection is correct. Make sure the hoses are connected to the correct water taps. Flush water lines. Disconnect the hoses and clean the screens. The hose filter screens may be clogged. While the washing machine fills, the water temperature may change as the automatic temperature control feature checks incoming water temperature. This is normal. While the washing machine fills, you may notice just hot and/ or just cold water going through the dispenser when cold or warm temperatures are selected. This is a normal function of the automatic temperature control feature as the washing machine determines the water temperature.
Does not drain and/ or spin.	Check the fuse or reset the circuit breaker. Make sure the electrical voltage is normal. Make sure the washing machine is plugged in. Make sure the drain hose is pointed downward. (Natural drain models only) Make sure the drain hose is not clogged. Make sure the drain hose is not kinked. Straighten the drain hose. If there is a drain restriction, call for service. Close the door, and press or tap START/PAUSE. For your safety, the washing machine will not spin unless the door is closed.
Load is wet at the end of the cycle.	Use the High or Extra High spin speed. (Applicable model only) Use high efficiency (HE) detergent to reduce oversudsing. Load is too small. Small loads (one or two items) may become unbalanced and not spin completely.

ECO TUB CLEAN

QUICK WASH > DELICATES > SOAK+NORMAL > ENERGY SAVING >

100 100 022.111			
Cycle	Description		
NORMAL	• Select this for most fabrics including cottons, liners, and normally soiled garments.		
QUICK WASH • Select this for less soiled clothes in reduced time.			
DELICATES	Washable sweater, cardigan, delicate clothes etc.		
SOAK+NORMAL	 Press this button to perform a soak wash. Soak time is set up as minutes. Can not change the soak time. 		
ENERGY SAVING	 Select this to wash effectively with a small amount of energy. 		
ECO TUB CLEAN	• Select this to clean the tub. The powerful spinning force will remove impurities and bad odours from inside the tub. If you see the I indicator blinking, this indicates that it is recommended to clean the tub using Eco Tub Clean. For details, see the Cleaning section in this manual.		

Manual cycles

1. Press POWER to turn on the washing machine

2. Press Function repeatedly to select an individual cycle (Wash, Rinse, or Spin). 3. Press START/PAUSE

Problem	Action
Leaks water.	Make sure all hose connections are tight. Make sure the water supply hose's rubber packing is in the correct position. Screw tightly again. Make sure the end of the drain hose is correctly inserted and secured to the drain system. Avoid overloading. Use high efficiency (HE) detergent to prevent oversudsing. Make sure the water supply hose is not kinked. If the water supply is too strong, water may leak. Close the water tap a little. Make sure water is not leaking from the water tap If so, repair the water tap.
Excessive suds.	Use high efficiency (HE) detergent to prevent oversudsing. Reduce the detergent amount for soft water, small loads, or lightly soiled loads. Non-HE detergent is not recommended.
The spin basket or drain/supply hose is frozen.	Use warm water to disconnect the water supply hose and drain hose. Soak them in warm water. Fill the spin basket with warm water, and then wait for about 10 minutes. Put a hot towel on the drain hose connector. Reconnect the water supply hose and drain hose, and check if water is supplied properly.
Water drains out immediately.	Make sure the drain hose is not clogged, and is hung over the drain hose hook. Fill the spin basket halfway with water, and try spinning again. Lift the end of the drain hose to prevent water from draining. Fill the spin basket halfway with water, and then run spinning after releasing the drain hose. Make sure the drain hose is installed correctly. See the installation section of this user manual and adjust the position of the drain hose as instructed.

Maintenance

Eco Tub Clean reminder

Cleaning

Keep the washing machine clean to prevent deteriorated performance and

\bullet The \blacksquare indicator reminds you of cleaning the tub when necessary. If you happen to see the indicator blinking after washing is complete.

remove the laundry and run the Eco Tub Clean cycle. You can ignore this reminder and continue to run cycles normally because this is not a system failure. However, the reminder remains active for 6 consecutive cycles immediately after each cycle is complete

Pump filter (applicable models only)

 The reminder is activated once every 1-3 months, depending on the To keep the tub clean, it is recommended to run Eco Tub Clean on a
